

Certificate of Analysis

Tris(hydroxymethyl)-aminomethane

Product no.: 1.02408.0080
Lot no.: 192408R
Description of CRM: Tris(hydroxymethyl)-aminomethane
Expiry date: 2024/01/31
Storage: +15°C to +25°C tightly closed in the original container
Composition: Tris(hydroxymethyl)-aminomethane

Analyte	Certified value as mass fraction	Associated uncertainty, $U=k \cdot u$ ($k=2$)
Mass fraction	99.97 %	±0.08%

Metrological traceability: Directly traceable to the corresponding primary standard NIST SRM® Tris(hydroxymethyl)-aminomethane 723e.

Measurement method: The certified mass fraction was determined by potentiometric titration with hydrochloric acid as titration solution. The certified value is based on a molecular mass $M = 121.136$ g/mol dried substance. 12,128 ✓

Intended use: This volumetric standard is intended for standardisation of volumetric solutions in accordance to the chapter reagents of the Pharmacopoeia (Ph. Eur., USP).

Instructions for handling and correct use: The volumetric standard Tris(hydroxymethyl)-aminomethane must be kept 24 hours in a desiccator above drying agent with a moisture indicator before use. By within-unit homogeneity studies a minimum weigh-in quantity of 150mg was determined.

Health and safety information: Please refer to the Safety Data Sheet for detailed information about the nature of any hazard and appropriate precautions to be taken.

Accreditation: Merck KGaA, Darmstadt, Germany is accredited by the German accreditation authority DAKKS as registered reference material producer D-RM-15185-01-00 in accordance with ISO Guide 34 and registered calibration laboratory D-K-15185-01-00 according to DIN EN ISO/IEC 17025.

Certificate issue date: February 04, 2019
